**GOOD WATER CO.
ANNOUNCES NEW PRODUCT**

Mike Paice, president of the Good Water Co., 4280 W. Reno Ave., Suite F, announced the launch of the company's follow-up product to its whole home reverse osmosis system, the Hydration Station.

The Hydration Station, a bottle-less cooler, attaches to the water source and supplies continuous hot and cold purified water.

"We anticipate this system to replace the bottled-water units in both homes and offices," said Paice. "The Hydration System provides not only bottle-quality water without the bottles crowding the house or office, but also better tasting coffee and tea."
